

Supporting the **prefabs** of tomorrow

RAW Bridge is an intelligent, collaborative, and robust robot ideal for the **prefabrication** industry. It operates on large surfaces in X, Y, Z movements and can be equipped with different tools to cope with the specific task at hand.

RAW Bridge is **adaptable** to all production tables and can easily be installed in existing production lines without major changes.

Production **automation**

Automating production and reducing the need for skilled labor

Easy to operate

Plug&Play optimization
Integration to Autodesk

Does all the **dirty** work

Minimizing the dirty and repetitive work
Securing better working environment

Consistent **quality**

Optimizing your quality and reducing faulty productions

Grinding

Multitool function

Custom tools

- your own unique tool

Insulation

Cutting

3D-printing

Polishing

Milling

Stapling

Duraspin

Nail shooting
